

ORBEL CORPORATION

Orbel was founded in 1961 as a Reel to Reel Electroplating Company to service the growing needs of the electronics industry. Over the years Orbel has combined expertise, technology, a commitment to quality, and advanced manufacturing skills to become a major supplier of custom precision engineered metal components to a wide variety of industries and customers throughout the world.

IN-HOUSE CAPABILITIES

With the ability to perform all operations in-house, Orbel is your one source supplier for custom precision engineered components. Orbel has a modern 57,000 square foot facility dedicated to manufacturing custom precision metal products and is able to deliver a quick turnaround of prototype samples and production quantities in exacting specifications. Orbel's company philosophy is to respond rapidly to customer needs and it has organized its internal processes – from initial customer inquiry through manufacturing and testing operations – to achieve this goal. Comprehensive in-house capabilities allow Orbel to maintain accountability and quality throughout the process and ensure on-time delivery of precision products.

QUALITY PERFORMANCE

Orbel works closely with customers to establish a comprehensive quality program adhering to AS-9000. During the launch of a new project, customer feedback and process documentation are critical. Internal product testing for major parameters along with an established sample retention program is structured to assure quality standards are upheld.

IN-HOUSE OPERATIONS

- Photo Chemical Milling
- Electroplating
- Secondary Forming
- Heat Treating
- Photo Tooling
- Passivation
- Electroplated Foil
- Reel to Reel Electroplating

INDUSTRIES SERVED

- Electronics
- Defense
- Telecommunications
- Aerospace
- Medical
- Power Storage
- Automotive
- Service Centers
- Home Appliance

APPLICATIONS

- Conductivity
- Thermal Shielding
- EMI/RFI Shielding
- Medical
- Prototypes
- Contacts
- Connectors
- Encoders
- Filters/Screens/ Sieves
- Washers
- Diaphragms
- Heat Sinks
- And More
